

NY15D Series - 1550nm Microwave DFB Laser Module

✧ Product Features

High-Dynamic-Range

18 GHz Bandwidth

Low threshold current

High output power

7pin butterfly package with SMA connector

Operating case temperature: -40 to 70°C

High reliability

✧ Product Applications

Antenna Remoting

Cellular and PCS Networks

Analog RF links transmission

Military Communications

Tracking, Telemetry, and Control

✧ Introduce Of NY15D

NY15D series module is a directly modulated DFB laser which provides exceptional performance for linear fiber optics communications in very wide bandwidth applications. NY15D's linear fiber optic lasers are an excellent alternative to using coaxial cable systems to transmit 12 GHz or 18 GHz signals. They offer significant improvements in reliability of microwave communications networks by transmitting the RF signal in its original format. As a result of these properties, laser products provides significant improvements in signal quality for a wide variety of applications including antenna remoting, telemetry, timing and reference signal distribution, measurement and delay lines

The NY15D series laser built in optical isolator, TEC, thermistor, laser diode chip, and monitor photodiode are hermetically sealed in a 7PIN butterfly package.

✧ Performance Specifications

Absolute Maximum Ratings				
Parameter	Symbol	Min.	Max.	Unit
Laser diode forward current	I_F	-	120	mA
Laser diode reverse voltage	V	-	1	V
Front power	P_f	-	20	dBm
PD reverse voltage	V	-	15	V
Forward current (PD)	I_m	-	2	mA
Operation temperature	T_o	-40	+70	°C
Storage temperature	T_s	-55	+85	°C
Storage relative humidity	S_r	-	85	%

Notes: All laser chips come from wafers that have been certified using a representative lot of devices that must achieve an acceptable yield for burn-in.

1. Laser temperature set 25°C, bias current at 55mA
2. Operation case temperature -40~70°C

✧ Precautions

- The fiber bending radius no less than 20 mm for avoiding fiber damaged .**
- Be sure the fiber coupling facet is clean before connecting it to opto-circuit .**
- The suitable ESD protection is required in storage, transportation and using .**
